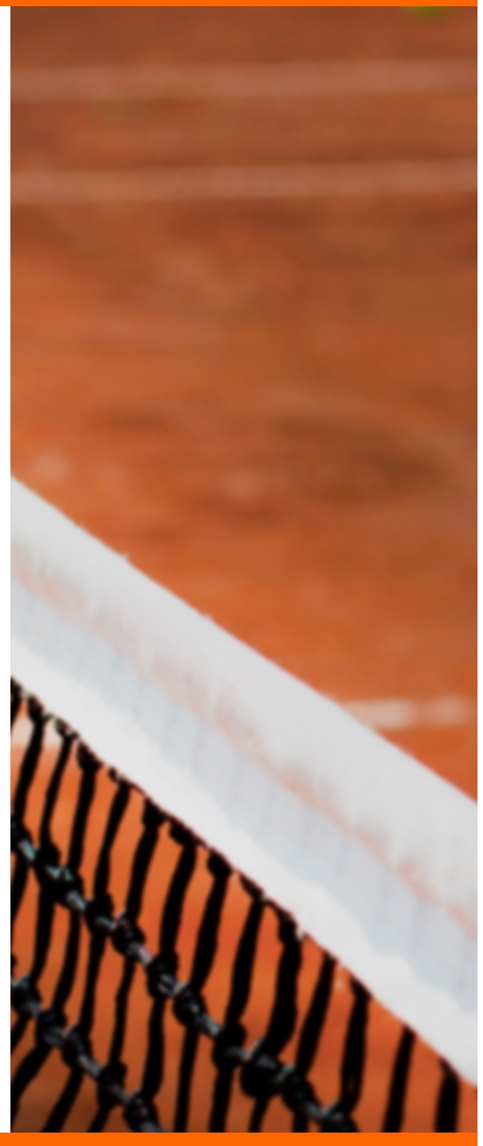
DEVELOP NATIONAL
JUNIOR PROGRAM

WALTER GRÜNFELD
TENNIS ACADEMY

"Development of a tennis player is more than just training them for the sport……..we must educate all young players holistically, not simply to focus on a particular aspect of the game" The development should start early for the players to be truly involved and aware of the process.

We focus on creating and developing our Young Players Development Program (YPDP). Our coaches have had many years of experience within this field, we know what a Junior Program needs in order to be the most effective for the development of the players and how this can be established.



DEVELOP NATIONAL JUNIOR PROGRAM

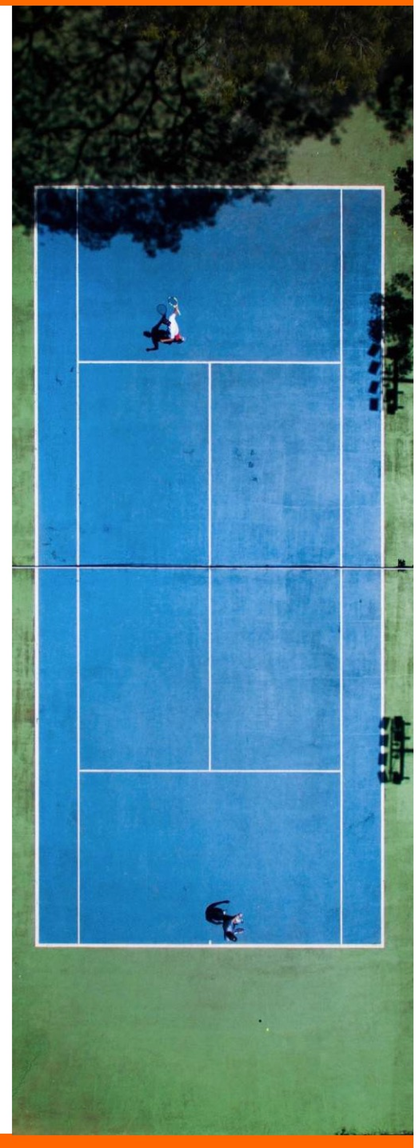
We propose that players get the exposure from 10+ years onwards to understand the process and the requirements and the rigour of the game. For this we have put together a program which will help these young players manage both academics and training with intensity.

The program that we create for our players are based on several key areas which will enhance the development of the players. We create a plan that focusses on the mental, physical, technical and tactical area as well as the nutrition, in order for the players to get more healthy and strong both physically and mentally.

We can help in all the necessary aspects that your junior program needs in order to develop. By establishing a good and effective junior program the maximize the players level.

ESTABLISH A PERMANENT TRAINING CAMP IN YOUR COUNTRY

WALTER GRÜNFELD
TENNIS ACADEMY



After we have been to your federation/ association/ club, where we have helped in the developement based on our Global Agreement, we can establish a permanent training camp at your federation/ association/ club.

The Walter Grünfeld Tennis Academy also organizes tennis camps. We have seen that the people who take part of our tennis camps programs improve their concentration, speed, balance and coordination and, at the same time, they experience an increase in their physical strength and their resistance which translate into less risk of heart diseases and obesity problems.

Besides the experience in the tennis camps that we organize, Walter Grünfeld (the CEO of the company) is also the CEO of Barcelona Sports Camps (BSC) and Barcelona Sports Tourism (BST). He has a lot of experience with creating and organizing different type of sports camps for different age groups and purposes.

PROMOTING TENNIS
IN YOUR COUNTRY

WALTER GRÜNFELD
TENNIS ACADEMY

A big part of the development of tennis in your country is based on promoting tennis in your country. WGTA has been invloved in marketing and knows exactly how to promote tennis and create a stragety based on any situation. We can help you with promoting tennis in your country which will highly increase the development of tennis in your country.

A higher participation rate will not only mean that more people participate in the sport but it also means that more people are physically active and therefore more healthy both mentally and physically.

A higher participation rate will help in the development of your tennis due to fact that there will be more resources and interest for the sport. The development of tennis in your country will create more opportunities for all the players.
